Volume 21

Martlet

Special Edition
for Secondary Students

Next Year at the University of Victoria

The Department of COMPUTER SCIENCE

OFFERS

— the following new one term courses Fall and Spring:

- **C.Sc. 100**

Elementary Computing - A general interest introduction to computers and their uses. Students will experiment with colour graphics, music, programming and computer assisted instruction problems on micro-processor based systems.

- **C.Sc. 110**

Computer Programming I - A first course in computing for students interested in a career in Computer Science, Mathematics, Engineering, Physics, Chemistry and other disciplines where computers are widely used.

— and more advanced courses leading to a B.Sc. in Computer Science.

The Department of MATHEMATICS

OFFERS

— General, Major and Honours programs in Applied Mathematics, Pure Mathematics, and Statistics.

Are you interested in formulating real-world problems and interpreting their solutions? Then Applied Mathematics, "the bridge connecting science and technology" will appeal to you.

Are you interested in formulating new mathematics and solving mathematical "puzzles"? Then Pure Mathematics will appeal to you.

Or, are you interested in the design of experiments, the collection of data and the analysis and interpretation of this data? Then Statistics will appeal to you.

+ CO-OP

If you are interested in computers - or maybe mathematics - or perhaps both (or you can't decide) we have a Co-operative Education program that allows you to alternate four-month campus terms with four-month work terms. While on campus you take the regular academic program leading to a B.Sc. in Computer Science or Mathematics (or a combination). The University arranges your work terms during which you are employed in math or computer work by our Co-op employers (leaders in industry, business, government and Research in major centres in Western Canada). In just over 4 years you work 20 months with up to 5 different employers and graduate with a Major or Honours B.Sc. with Co-op designation - excellent preparation for either career or Graduate School.

— Co-op confirms your degree choice
— Co-op helps you plan your career
— Co-op makes your courses more relevant
— Co-op develops your skills and confidence for one of the many careers in computing and math.

= CAREER [SUCCESS]

VICTORIA, B.C. V8W 2Y2

What's In This For You?

Some of you have already decided not to go to university this year and some of you have already had that decision made for you. For the rest of you who may be considering university, or have decided to go on to university then this special highschool edition of the **Martlet** will hopefully be of some assitance to you.

Throughout the paper you will find ads from most of the departments on campus, with a brief description of their program, and information on where you might look for more. Inside you will also find short articles written for you by various people on campus: the Univeristy President, the student society (Alma Mater Society) President, the **Martlet** editor, the students' ombudsman.

Housing, money, and jobs are the focus of yet more articles scattered through these pages. But this is meant to be just a start, a teaser, if you like, for those of you who are considering university.

If you are serious about university you will want more information than you will find here. One place to start looking for this information is with one of your school counsellors. Another is here at the University of Victoria. On campus there are a number of people whose job is to provide you with information and many others who are willing to help you if they can. Basic registration advice, course calenders, and admission requirements are available by writing:

ADMISSION SERVICES
Office of the Administrative Registrar, University of Victoria, P.O. Box 1700, Victoria, B.C., V8W 2Y2.

If you go to school on Vancouver Island, advisers from UVic's admission services will visit your school in May and they will be able to give you information and in may cases provisionally admit you and pre-register you for your fall courses.

Another place to look for information is the student organization, the Alma Mater Society. Every year they produce a student handbook that is written expressly to give new students information, help, and advice on the university, the city, and life as a student, in, and around the University of Victoria. This guide is available at early registration —July through August, and again in September, or can be obtained by writing the:

Alma Mater Society
University of Victoria
P.O. Box 1700
Victoria, B.C.
V8W 2Y2

If you have any specific questions about the University of Victoria you may find the answers on the pages following. If you have further questions feel free to write to either of the above addresses and they will direct your inquiries to the appropriate places.

Compare UVic

Once you make up your mind to go to university, your next move should be deciding which one.

Being as how this is a publication of the University of Victoria student society you probably don't expect us to recommend UBC or SFU. Well, you won't be disappointed. It is not that we are prejudiced, its just that UVic is, quite simply, the best place to go to university.

For one thing UVic is small. In enrollment, at least, it is the smallest of the three B.C. universities with a total full time enrollment of a little over 5,200 undergraduates. Even when you add the part timers and the graduate students you wouldn't be able to find 8900 people on campus if they ever decided to all show up at once.

A smaller size than the other three universities means a lot more than you might think. It means that UVic concentrates its efforts on a smaller number of departments, each with a smaller number of students. Academically this makes it easier for the university to maintain its high standards. It also means that the chairman of a department is not a nameless face that just issues maddening memos, but is somebody many students know and have as a professor. It means more personal contact with the faculty and that means more value for your tuition dollars.

The smaller number of students also results in closer contact with other students. You go to classes with the people in your dorm; friends with the same interest end up in many of your classes; and you don't have to walk miles to meet somebody for lunch.

The UVic campus is attractive and well planned. If you do live in residence you are only five minutes away from the Student Union Building. You can park near your classes if you drive in from off campus, and no class is more that five minutes walk from another. The buildings are all on a human scale, none of them over four stories tall, and are attractively designed (with a few exceptions).

What about the city of Victoria itself? There is no doubt that it is one of, if not the, prettiest city in Canada. It too is built on a human scale with few skyscrapers, lots of pedestrian malls, lots of access to the waterfront. The climate is described as "mediteranean." This means that your feet will stay a lot dryer here than they would across the pond in Vancouver.

Talking about across the pond, Victoria is a lot easier to get around than the megapolis which houses the other two universities. If you live off campus and in Victoria, you have got no excuse if it takes you more than fifteen minutes to drive to the university. If you are hopping busses you will never have to transfer more than once.

Aside from the physical environment you will find the intellectual environment at UVic more stimulating than that at most other universities. Students are thinking and doing things, and the size of the university means that most of these things get done. Students are standing up for what they think are their rights, are lobbying more and more effectively, and are attempting to have more of a say in the direction of their education. Course Unions, students unions within most departments, have representatives that vote on department policy issues, on the hiring of new faculty, and who are organizing tutorial sessions, publishing books of student work, and organizing social events. UVic is an exciting place to be a student.

Despite the fact that we are small we have excellent facilities. In terms of recreational facilities, laboratories, research equipment, and library holdings we are competitive with the other provincial universities, and we have less students crowding about to use them.

These are just a few of the many reasons why we know we are at the right university.

It's never too early!

Plan Your Career NOW!

ALUMNI ASSOCIATION

$ $ $

Going to univeristy is not free. It costs money, lots of money if you have to live away from home. There is however, some help available.

Financial aid is available in the form of loans or grants from the federal and provincial governments, to many students who cannot afford to go to university without help.

The financial aid is distributed through the B.C. Student Assistance Program. They work on the philosophy that meeting university expenses is basically up to the students and their parents. "Very basically," says Nels Granewall, UVic's financial aid manager, "the better off your parents are, the less likely you are to get financial aid. Parents are expected to contribute if they can."

There are some situations however where you needs will be assessed without regard to your parents: if you are married, or have worked in the full time labour force for two years.

To get an application for financial aid, phone or write the Student Financial Aid Office, University of Victoria, P.O. Box 1700, Victoria, B.C. V8W 2Y2. Because applications go through a long approval process you must have your forms in by mid-June to ensure that your money will be ready by September.

Needy students who fall into the right categories may also qualify for a bursary for which there may be few other competing applicants. For a list of these bursaries look in the section of the UVic calender entitled Financial Aid.

If you are one of the lucky few who are academically or athletically outstanding you can also apply for the available entrance scholarships that are listed in the back of the University of Victoria calendar.

Needy students are eligible during the school year for part-time course related employment in many departments of the university under the Work Study Program.

So you see, with certain limitations there is money available for the asking. All you have to do is ask, and ask quickly. All the deadlines are almost upon you.

M. Peecock

OFFICE OF THE ADMINISTRATIVE REGISTRAR ADMISSION SERVICES

ADMISSION FROM SECONDARY SCHOOL AND COLLEGE

SECONDARY SCHOOL GRADUATES - 1981

Early Notice of Admission

If you are graduating this June, you may be eligible for early notice of admission. Full details are available at your secondary school counselling office.

General Admission

You need not apply early, as the application for admission deadline for most programs is June 30th. Pick up and complete an application for admission through your secondary school counselling office and arrange to have an **Official Final Transcript** forwarded directly to the Director of Admission Services.

COLLEGE TRANSFERS

The application for admission deadline for most faculties/programs is June 30th. Pick up and complete an application for admission through the appropriate office at your college and arrange to have an **Official Final Transcript** forwarded directly to the Director of Admission Services (if you have not applied previously to UVic, an official secondary school transcript is required).

RECORDS SERVICES REGISTRATION

You may register after you have received your Letter of Admission. At the same time you will receive a Course Selection Form, Course Timetable and other registration materials. Bring these documents with you to registration.

EARLY REGISTRATION

July 8 - August 14 (except August 3)

Monday and Thursday
12:30 p.m. - 4:30 p.m. and 6:00 p.m. - 7:30 p.m.

Tuesday, Wednesday, and Friday
12:30 p.m. - 6 p.m.

Rooms 135 & 137 Student Union Building
[East and West Lounge]

You are encouraged to register during the Early Registration period. By doing so you may avoid lineups in the Fall.

If, however, you are unable to early register, the September Registration period is September 8 - 10. Registration at this time will take place in **S Building (Old Gym)**.

Advice regarding course selection is available on campus. You are urged to consult the appropriate Faculty Advising Centre before registering in courses.

UVic's President Report

As you have progressed through secondary school, I am sure that your awareness of and interest in the world around you has increased steadily and that you have been wondering where you are going to fit in, what direction your life will take, and what the future holds.

It is not easy to make life decisions unless you have particular goals in mind. Once you have established your goals, you will find that you have obtained a great deal of self assurance which will be of benefit to you no matter what undertaking you may pursue. Your school has a guidance counsellor with whom you should discuss your plans. You will find that he or she will be of great assistance.

If you decide that you wish to continue your education at university, advice is available at the academic counselling offices at the University of Victoria. The staff in these offices are friendly and have a wealth of knowledge concerning the various degree programmes available.

You will feel your excitement grow as you discuss the academic challenges you are about to undertake, and later, as you progress through your studies, you will find them both exhilarating and rewarding.

The University of Victoria is a happy lively place, committed to excellence in teaching, research and service to the community. It is currently experiencing a period of rapid development both academically and physically.

Our increasing involvement with professional education has led to the establishment of programmes in Public Administration, Nursing, Child Care, Social Work and Law. The Department of Computer Science was established in 1980 to help meet the mushrooming demand for trained professionals in the data processing field. An Engineering Faculty is in the planning stages and, if the necessary approvals are obtained, will likely be ready to accept students in the mid-1980's.

The University of Victoria pioneered Cooperative Education in B.C. In Cooperative Education programs, students spend alternate four-month terms in university and in jobs related to their academic programs. This enables students to obtain an effective blend of theory and application which is extremely difficult to provide in the normal academic program. Employers have acclaimed the Cooperative Education Program and eagerly seek graduates with this background.

To keep pace with our new academic programs and to replace our old army huts, we have undertaken a major expansion of our facilities. The University Centre, a vocal point for students, staff and faculty, the Music Wing of the MacLaurin Building and the fourth wing of the Clearihue Building which houses all the humanities departments, are recent additions.

The beautiful Begbie Building, with its extensive library and moot court was opened in 1980 for the Faculty of Law.

A new academic building for the Theatre Department with two intimate theatres will be ready for occupancy by UVic's theatre students during the 1981-82 academic year.

A new residence complex, bringing the total residence spaces at UVic to almost 1,100, will also be ready for occupancy this fall.

Along with our excellent and varied academic programs, UVic provides athletic and recreational activities, both organized and informal. Our intercollegiate teams in many sports have competed successfully with the best in Canada. Both our men's and women's basketball teams have won the Canadian Interuniversity Athletic Union championship for the past two years is a row. We have a vigorous intramurals program with organized leagues and a wide variety of recreational courses.

The commitment you now make to your educational goals will determine your future. And if that commitment brings you to the University of Victoria, I take this opportunity to welcome you and to wish you well in the courses that you undertake.

Make this your first stop on campus.

For general inquiries, the Information Booth at the University Centre (the building with the copper domes) has the answers.

COOPerative Education

Academic Training plus Work Experience

COOP integrates academic training with experience in a working environment related to the student's courses of study.

Our COOP students have identified these advantages:

- accumulation of valuable work experience
- integration of academic preparation and on-the-job experience
- early evaluation of different career paths
- financial assistance
- development of confidence and skills in working with people
- opportunity to try different types of positions and locations

Our COOP employers say:

- students contribute in a meaningful way through completion of various projects
- co-op students are a source of highly trained and highly motivated future employees
- our long term recruitment costs are lower and employee retention rates higher
- co-ops are enthusiastic workers and that spirit is infectious

Perhaps you should consider this integrated approach to higher education.

Co-op is offered in:

Chemistry	Geography	Mathematics
Computer Science	Leisure Studies	Physics
Creative Writing	(School of Physical Education)	

UNIVERSITY OF VICTORIA

Bix Burkhart

A warm place to stay.

Sleep And Eat On Campus

Looking for a warm, dry place to stay, meals and social life provided? Try "Residence Life" at UVic.

The University of Victoria has space for 903 students in single and double rooms and by September 1981 hopes to have 176 more. Residence provides you with:

—a comfortable, if small room
—bedding, and laundry facilities
—meals, judged by some to be the best residence meals in Canada (although that is not much of a standard to go by)
—an instant circle of friends
—a social life that is as busy as you want to make it
—television lounges and refrigerators in each building
—a five minute walk (at most) to all of your classes.

Applications for residence spots always exceed the capacity so if you have not applied yet write to Housing Services, University of Victoria, P.O. Box 1700, Victoria, V8W 2Y2, and get an application sent to you as soon as possible. If you are put on a waiting list, do not despair. Many students do not take the rooms they are offered and the University has quotas for each of: first year students; second year and transfer students; returning students; and senior, foreign and handicapped students. If you have not been placed in residence by September and still want to be, remember that vacancies occur throughout the year and in past years everyone has been placed by Christmas.

If you are accepted into Residence for the 1981-82 winter session you will pay $2035 for a double room and $2300 for a single.

housing services

residence accommodation

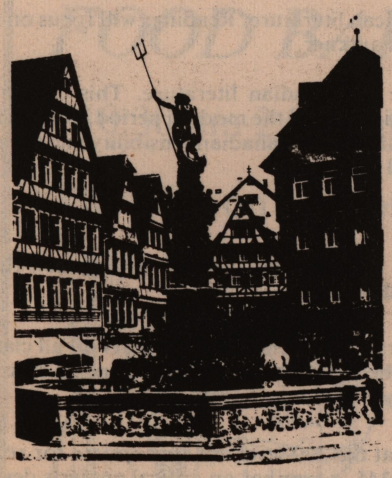
IF YOU HAVE APPLIED FOR RESIDENCE ACCOMMODATION:

1. Room assignments will be mailed out in July.
2. If you have not been assigned a room by the end of July you will be given the opportunity to have your name placed on the waiting list.
3. As cancellations are received, assignments are made to those on this list.
4. The list is maintained and the necessary correspondence followed up until September 4th.

off campus housing

1. Lists of accommodation available in the Victoria area are maintained by the University Housing Services.
2. Due to the rapid turnover of this accommodation, listings are not mailed out but may be viewed in the lobby of the Housing Office, seven days a week throughout the summer.
3. Staff are available to provide assistance.
4. If you are planning to be in the Victoria area during the summer we urge you to make enquiries then. Early registration is a good time!

Germanic Studies At UVic



A broad and fascinating area covering the language, literature, art forms and culture of the German speaking countries.

Study the Language

Contact the Chairman - Tel: 477-6911 (loc. 4259)

department of English

FIRST YEAR

All students thinking of coming to UVic should write the Provincial English Placement Test **or** the Scholarship Composition Examination. Placement in the first-year programmes described below will be determined by the student's performance on either of these tests.

Remedial Programme:

Students who do not achieve satisfactory standing on the tests noted above must take this programme in their first year at the University.

Fall Term, English 099—Remedial Composition (no credit)
Spring Term, English 115—College Composition (1½ units)

Students should register in both English 099 and 115, but may not take the second course until they have passed English 099.

Regular Programmes:

Students who achieve satisfactory standing in one of the placement examinations may elect to take no further English at the University. It should be borne in mind, however, that several programmes at the University of Victoria (all those within the Faculty of Education, for example) require three units of first year English; in addition, many major institutions elsewhere follow the example of U.B.C. in requiring first year English of all students.

The normal sequences for first year English are 121/122 (programme A) or 115/116 (programme B). Permission of the Department is required for any other combination. For those who elect to take first-year English, two programmes are available. Only one course may be taken in the first term; with permission of the Department, however, two courses may be taken concurrently in the second term.

Students intending to graduate in the Faculty of Education, School of Social Work, or School of Child Care should consult with the appropriate faculty regarding course selection.

Programme A — Fall term, English 121, Literature: Prose Fiction (1½ units)
Spring term, English 122, Literature: Poetry and Drama (1½ units)

This is the normal route for those who want a balanced programme of literature and composition. In the first term students take English 121 (novel and short story) and in the second term English 122 (drama and poetry). The emphasis is on modern literature. Writing skills are also taught in this programme, with not less than ¼ of each course weighted towards composition. In each term students will write a minimum of four essays in which they will be required to develop accurate expression and effective organization.

Programme B — Fall term, English 115, College Composition: (1½ units)
Spring term, English 116 (1½ units)

Those who require intensive work in composition should register for this programme. The purpose of English 115 is to encourage the student to write clearly and cogently, whether the subject is a factual report, an argumentative essay, or a research paper. Some prose will be studied to illustrate methods of writing.

English 116 is an introduction to all forms of literature (novel, short story, poetry and drama). As in English 121 and 122, students will write a minimum of four essays in which they will be required to develope accurate expression and effective organization.

SECOND YEAR

Courses at the second-year level provide surveys of literature in English, as well as special literary studies and training in composition. These courses are designed not only for students who plan to do advanced work in English and other areas (such as History, Political Science, and Languages), but for those wishing an introduction to a particular literature. Normally, three units of first-year work in English (115/116, 121/122, or an approved combination) are required for entry into English courses numbered 200 and above. Students with strong backgrounds in literary study may apply to the Department to take second-year courses in their first year.

Full-year surveys:

English 200—a survey of English literature from Chaucer to the Romantic period.

English 201—a study of Twentieth-Century literature (including works of Joyce, Hemingway, T.S. Eliot) with particular emphasis on important modern themes.

English 203—an introduction to American literature. Readings will focus on such major writers as Whitman, Twain and Faulkner.

English 238—an introductory course in Canadian literature. This course will include prose and poetry from the beginnings to the modern period, emphasizing important figures who have helped to shape the Canadian sensibility and to define the distinctiveness of Canadian cultural traditions.

1½ unit courses:

English 215—an investigation of the style and methods of writing non-fiction prose (required of many Education students).

English 250—A variable content course, which this year will offer a Fall class on "Some Versions of Utopia", and "The Detective Story" and a Spring class on "Literature and Industrialism".

In addition, some courses numbered at the 300-level are appropriate for second-year students. These include English 345, a seminar on critical analysis designed for students planning to Honour in English (permission required); English 301, a survey of children's literature.

Housing: Students' Biggest Problem

By TIM WINKELMANS

The largest single problem facing new students from outside the Victoria area is the severe shortage of affordable housing. In the past five years, the number of listings for off-campus accomodation has decreased by twenty per cent. Despite the new residences which are scheduled for completion for the fall term, the waiting list is still the longest it has been in eight years. Victoria has what is effectively a negative vacancy rate, and as rents continue to climb, students are being left out in the cold. Students are relying increasingly on room & board accommodation in private homes as the listings for apartments and houses gradually disappear.

Students normally leave their quarters in the spring and find new places in the fall. This year, many students leaving apartments and houses to work elsewhere are subletting their places for the summer to ensure that they will have living quarters in September.

UVic's Housing Services will be working very hard to place all students requiring both on and off-campus accommodations. They have set up a housing registry to deal with the situation, and will have extra staff available for consultation. The AMS will be campaigning locally to make homeowners and landlords sympathetic to the students' plight. Even now, however, as B.C. residents who may be denied access to an institution to which you and your parents contribute taxes, there is something you can do. Write!

On-campus housing could at one time be built affordably by universities because of the easy financing terms available. The Universities Council of British Columbia (UCBC) provided grants to reduce the mortgage size, and the Canadian Mortgage and Housing Corporation (CMHC) provided financing at very low interest rates. Two decisions changed everything.

CMHC, observing the reduced demand for on-campus accommodation in central Canada, attached a low priority to residence funding. The UCBC felt that educational funds should not be spent on housing. Universities must now borrow all funds to build student residences at the market rate. Even at the best rate available—about eleven per cent—the interest payments alone would make student residences inaccessible to all but the very well-off.

A few well-directed letters may be effective if tax-payers and voters will write to protest the short sighted policies of the agencies involved.

You can help improve the situation by writing any one, or all of the following and telling them that you want affordable student housing:

Hon. Brian Smith, Minister of Education
Hon. Patrick McGeer, Minister of Universities, Science and Communications
Hon. Hugh Curtis, Minister of Finance
Hon. James Chabot, Minister of Lands, Parks, and Housing

Address for the above: Parliament Buildings, Victoria, B.C., V8V 1X4

Universities Council of British Columbia
500-805 West Broadway, Vancouver, B.C., V5Z 1K1

The **UVic Bookstore** orders all textbooks according to the requests from instructors.
The books are arranged by faculty and course number on clearly labelled shelves.
Our general book section carries a wide selection of books for fun, entertainment and study and invites you cordially to come and browse. Our special order section will order for you on request books from anywhere in the world.

The UVic Campus Shop welcomes you to the only place on campus where your shopping needs will be satisfied, be it: Crested Clothing (including several different T-Shirts) and Gifts, School Supplies, Cards, Stationery, Art Supplies, Sporting Goods, Drugstore items, Films, Batteries, Calculators, Records and Magazines. We also offer a Photo-Finishing and Postal Service.

COUNSELLING SERVICES
University of Victoria

Students Are Special, seeking to develop their potential with further education. This often puts them under a lot of pressure. Students are people, with everday needs and problems, and that is normal. Our Counselling Services can help you with personal concerns, uncertainty about educational and vocational plans, or learning and academic problems. No problem is too small for consideration.

Individual Counselling

- Adjustment to University life
- Career planning with tests
- Coping with anxiety & moods
- Learning and study methods
- Personal concerns
- Everyday problem solving

Personal Growth Groups & Workshops

- Assertion Training
- Jobs & Careers - How to Plan for Them
- Time Management
- Interpersonal Communication
- Self Exploration - Women and Men
- Self Control for Weight Control

University Learning Skills Programs

- A Transition-to-University course for new students designed to improve reading efficiency, memory, time management, library use, essay writing and exam writing skills. Half days Autust 31 to September 11, mornings or afternoons, $50. Limited space.

- Short courses and workshops on University Learning Skills designed to improve reading efficiency, time management, study methods, essay and exam writing, organization, note taking and memory skills. Starting late September and again in January, $15.

Career Library

A resource centre with people and books to help you choose your major and clarify your career plans and goals.

Advanced Education Tests are provided, like the Law School Admission Test, the Medical College Admission Test, the Graduate Record Examination, and others.

WALK IN
Room B202, University Centre

Professional counselling is confidential and without charge.

Your Campus Ombudsman

Now you know there is an Ombudsman on campus. What does that mean? That you are likely to find a Scandinavian ice cream vendor around the university? Not even close. The Ombudsman you'll see around UVic is a person hired by the AMS, UVic's student union, to provide students with information about university rules and regulations and to investigate student grievances.

Most students make it through university without visiting the AMS Ombudsman for the simple reason that most make it through without encounterening major problems. If you're one of the unfortunate few, however, the ombudsman's office is the place to visit. Whether it's an admissions problem, a conflict with an instructor, a final grade that you don't believe is calculated correctly, a change in course requirements half-way through the term, a concern over fees, fines, and refunds, or a problem with any office or department on campus, my office door is open.

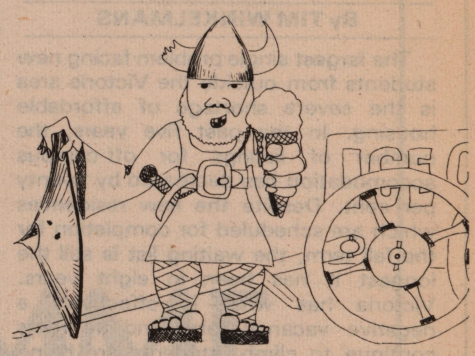
It doesn't have to be a matter of academic life or death. If you believe that you have been treated unfairly, or if you simply have concerns or want information about regulations and procedures, don't hesitate, drop by Room 133 in the SUB (Student Union Building), across the hall from the east/west lounge, during my office hours. Thses hours will be posted at various locations around campus. If you can't make it in then, drop by the general office, just inside the front doors of the SUB, and arrange an appointment.

I won't always see eye to eye with you on your concerns, but I'm always willing to listen, and if after an informal investigation, I'm convinced that you've been treated unfairly, or that university regulations have been contravened, or that you've run up against an inequitable regulation, I will intervene. All contacts with my office are confidential and your name will not come up during an investigation unless absolutely necessary.

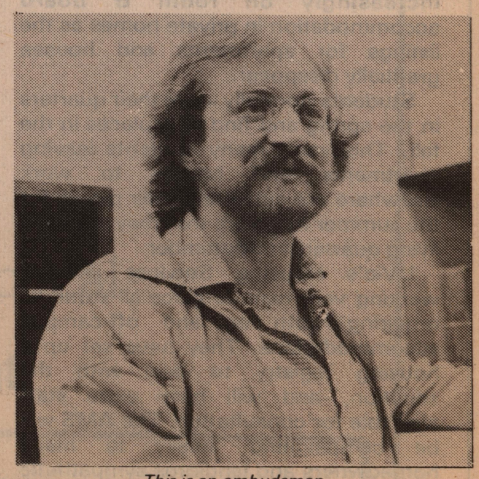
If its ice cream you want, check one of the cafeterias. If it's help or advice you need, see the Ombudsman in the SUB.

Enjoy your year,

Bruce Kilpatrick



This is not an ombudsman.



Genga Muttiah

This is an ombudsman.

examine your life

study philosophy

Do you hold your opinions and beliefs as one who has been indoctrinated, or as one who has been educated? What is the difference? Can you justify your beliefs and opinions? Are you able to distinguish a successful piece of reasoning from one which is confused or invalid? Does justice, or truth, or human good matter to you? Or art, or science, or religion? Are you able to give an account of what each involves?

PHILOSOPHY DEPARTMENT

The following courses are open to first as well as second year students:

Introduction to Philosophy [100]
Applied Logic I and II [201/203]
Existentialism [211]
Philosophy of Religion [214]
Philosophy of Science: I and II [222A/222B]
Moral Problems of Contemporary Society [232]
Philosophy of Education [233]
Violence, War and Terrorism [235]
Aesthetics [242]
Medieval Philosophy [245]
The Self, Communication and Understanding [269]

At the third and fourth levels there are courses in **Ethics, Logic, Epistomology, Metaphysics,** and the **History of Philosophy.**

For further information about each course, including a list of texts, pick up a copy of the**Philosophy Department's 1981-82 handbook** at our office (Clearihue B334); or make an appointment with the **Departmental Advisor** (phone 477-6911, local 6620); or write to **The Chairman, Department of Philosophy, University of Victoria, Victoria, B.C. V8W 2Y2.**

Tim Winkelmans

Jenga Muttiah

The Alma Mater Society (AMS) of the University of Victoria is responsible for providing the social support that makes life as a UVic undergraduate a stimulating proposition, The Student Union Building (SUB) is the nucleus for most AMS activities, and it is there that you can find entertainment, information, and political involvement. Every student registered in an undergraduate course at UVic is automatically a member of the AMS.

The SUB has two food service operations, the Cafeteria and the Health Food Bar, open from 11 A.M. until 2 P.M., provides a tatntalizing selection of salads, sandwiches, and organic junk food.

After 4 p.m., the Cafeteria becomes the Pub. Not open to UVic students under nineteen, unfortunately, it serves as the key on-going social focus on campus, particularly when a band or D.J. service provides dance music.

The **Martlet**, the student newspaper, is published weekly during the winter session by the AMS. Our two other major publications are the **Student Directory**, which is available in early fall, and the **Ombudsman's Guide**, the latter is a student survival manual full of information and advice about UVic and Victoria. It will be available for early registration. All of these are provided as a free service to students by the AMS.

Cinecenta, the campus movie theatre, is also located in the SUB. New films, foreign films, art films, and old calssics are all offered at an incredibly low $1.25 to students. Movies are shown six nights per week. Free noon-hour films are also offered on a weekly basis in the SUB theatre.

For students who feel that they have been shafted by professors, courses, or the University bureaucracy, the AMS has established an Ombudsman's office. The Ombudsman can provide you with information on available services as well as assist you in cutting through red tape. His office is in the SUB and office hours are posted on the door. Again, this service is available at no charge to AMS members.

The main subsidiary organizations of the AMS are the clubs and the course unions. The various clubs provide facilities for a wide range of recreational, academic, and political interests. Course unions offer students taking courses in specific faculties and departments with the opportunity to present their ideas on course content and development, faculty selection, and the general enhnacement of the subject area at UVic as well as a way to meet people with similar interests. Inspect the various displays in the SUB on Clubs Day during Orientation Week, and discover which courses and professors will be of most value to you.

Orientation Week will be organised around an exciting sampling of concerts, speakers, dances, and other activities designed to introduce new students to the University and to each other. Almost all of the events planned for Orientation will be free. Look for more information in the **Martlet** in September.

The AMS is guided by a neneteen-seat Board of Directors (BOD). There are four paid executive positions on the Board; President; and Vice-President Finance; Vice-President Programmes; and Vice-President Services. These people are here to serve you and are responsible for the daily affairs of the Society, as welll as establishing the general tone of students life on campus. The fifteen ordinary directors are charged with representing the campus student population on the BOD and assisting and scrutinizing the executive members in their duties.

The principal elections are held in March, but there will also be by-elelctions for a few positions on the BOD early in the fall term. Serving as a director is an excellent way of comprehending the full extent of campus activities, and will assist you in the explanation of your personal interests. Meetings are held weekly in the winter session and any student may attend.

Students are also involved in other areas of the univeristy's decision making procedures. Undergraduates have elected representatives on both the Senate, which governs academic affairs, and the Board of Governors which controls the University purse strings. Students are also appointed to an array of committees dealing with jsut about every facet of campus life. If you have any interest at all in providing input into the university's growth, please contact me in the SUB. My office is on the top floor, and I am eager to gather names, opinions, and ideas.

You will be an AMS member at UVic, and your Board of Directors will be working to improve it, but our effectiveness is enhanced when we know how our fellow students think. Come and talk with us this year.

AMS Shines

On Saturday, September 19, the Alma Mater Society will be sponsoring the annual Shinerama fund-raising drive. On Shinerama Day hundreds of UVic students will go out into the surrounding community and shine shoes for donations, all of which will be forwarded to the Canadian Cystic Fibrosis Foundation. (CCFF).

Cystic Fibrosis (CF) is a hereditary disease which affects one in every 1800 Canadian children. The disease is a disorder of the exocrine system and affects respiratory and digestive systems of the patient. DF is presently incurable, although break-throughs in treatment have allowed more and more CF sufferers to attain adulthood. But the cure is still a long way off...

Shinerama has been a part of UVic's Orentation Week since 1969. Last year the drive was reinstated after a one year absence, and raised nearly five thousand dollars for the CCFF. UVic's accumulated total since Shinerama started is approximately $88,000.

Shiners will register with the Shinerama orgabinzers on or prior to the morning of September 19. They will then be assigned to shining locations throughout the city. Lunch and and individuals who collect the greatest amount will be given at the Shinerama banquet. Also, a free dance will be given for all shiners on the Saturday evening. amount will be given at the Shinerama banquet. Also, a free dance will be given for all shiners on the Saturday evening.

Shinerama is one way the UVic students are involved in the Victoria community. The success of the Shinerama campaign depends upon students involvement. Help give a child the breath of life.

LINGUISTICS

DID YOU KNOW...

HOW language and culture are related?
WHY nobody ever says anything twice in exactly the same way?
THAT the word **mouse** is at least 4,000 years old?
THAT there are 39 Canadian Indian languages spoken in British Columbia?
HOW babies learn to talk?
HOW different languages break up the colour spectrum?
THAT English is related to Persian, Hindi, and Russian, among other languages?
THAT Canadians speak a distinctive variety of English?
WHY a Texan can't understand a Yorkshireman though they both speak English, But an Italian may have little trouble understanding a Spaniard?
THAT many native languages of Canada are more complex than European languages?
HOW a knowledge of the way language works can help you in almost any field of study?
THAT a third language is easier to acquire than a second?

For further information contact

DEPARTMENT OF LINGUISTICS
Tel. 477-6911 Local 4406

DO YOU PLAN TO BE
- a teacher?
- a writer?
- a lawyer?
- an actor?
- a philosopher?
- a sociologist?
- a speech therapist?
- a computer expert?
- a psychologist?
- an anthropologist?

WORK IN
- public relations?
- advertising?
- broadcasting?
- journalism?
- public affairs?

THE DEPARTMENT OF LINGUISTICS

offers courses in
*Introductory Linguistics
*Native Indian Languages
*Anthropological Linguistics
*Psycholinguistics
*Historical Linguistics
*Applied Linguistics
*Dialectology
*and other areas of the study of language and its structure at both the undergraduate and graduate levels.

SOCIOLOGY

HOUNOURS, MAJORS AND GENERAL PROGRAMMES

The study of human relations as they are related to crime, families, child care, social welfare, nursing, work and occupations, urban society and much, **MUCH** more.

For more details and a pamphlet on employment opportunities in Sociology, write:

Chairman, Department of Sociology,
University of Victoria, P.O. Box 1700

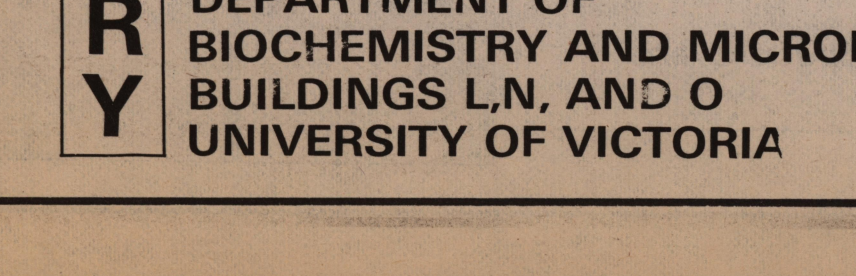
or phone 477-6911, local 4568



SPANISH

The language of Spain, Mexico, Cuba, Central America and most countries of South America

ITALIAN

A major European language with strong representation in areas of Canada

- ★ Beginning, intermediate and advanced language courses
- ★ Language laboratory practice
- ★ Literary studies programmes for general, major and honours

Department of Hispanic and Italian Studies

Tel. 477-6911 Local 6611

BIOCHEMISTRY

DID YOU KNOW...

MICROBIOLOGY

Biochemistry and **Microbiology** are the two largest and fastest growing disciplines in all of science.

Biochemistry and **Microbiology** aims involve not only an understanding of the fundamental principles of life but also the creation of new life forms (recombinant DNA studies).

Biochemistry and **Microbiology** study and research has attracted Chemists, Physicist, Mathematicians, and Engineers.

Biochemistry and **Microbiology** are mandatory for the training of students in medical fields.

Biochemistry and **Microbiology** enhances the acceptance of students into Medical and Dental Schools.

Biochemistry and **Microbiology** training are required by the vast majority of employers in the Biological Sciences.

Jobs in **Biochemistry** and **Microbiology** are available in all branches of federal and provincial environment departments including agriculture, forestry, fisheries, and environmental research. As well, pharmaceutical and chemical companies, breweries, distilleries, wineries, food manufacturers and processors, and food and nutrition laboratories need **Biochemists** and **Microbiologists.**

Biochemistry and **Microbiology** is a unique, rapidly growing department at UVic attracting more research support per person than any other campus department.

If you don't know some of these things come and talk to us or look into it yourself and think about the following courses:

For General Students, Psychologists, Sociologists, Social Workers, Child Care, Nursing - Basic courses only high school chemistry and biology required.

Micr 101[F. or S.] - a basic one term course for those wishing a single condensed course in microbiology.

Bioc 201[S] - Nutritional Biochemistry - a one term course concerned with the biological basis of nutrition.

For Biologists, Chemists, Physicists, and our own students as well as pre-medical and pre-dental students:

Micr 200 - Introductory Microbiology
Bioc 200 - Introductory Biochemistry
Bioc 300 - Biochemistry

For our own and other serious-minded students:

Micr 301, 302 and 400
Bioc 401 and 402

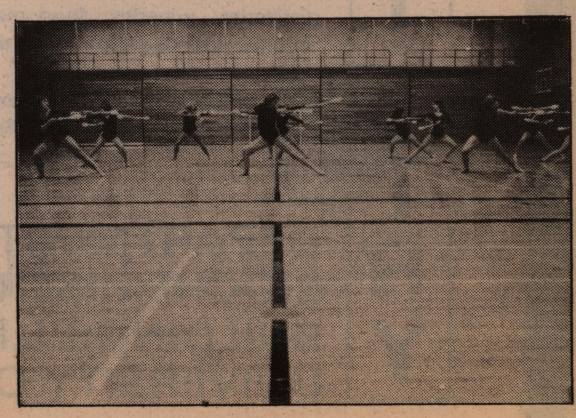
Recreational Leadership Programme
Tournaments and Special Events



SPORT and REC OPPORTUNITIES ABOUND

Ian MacKay

Janice Bruce, UVic rowing team coxswain

UVic's recreation centre is the McKinnon complex, located on the outside of Ring Road, the University Centre. The McKinnon boasts a 25-metre L-shaped pool, squash courts, gymnasium, apparatus gym as well as weight room, dance studio and fitness appraisal centre. Your AMS-Library card entitles you to use all of these facilities.

You do not have to be an athlete to take advantage of the McKinnon facilities either. There are several programmes geared to increasing physical flexibility and cardiovascular activity, not to mention just keeping fit. And there are daily recreational activities.

Athletics and Recreation offers a unique Outdoor Recreation Program using the University's Jean S. Simpson property on Cowichan Lake. Introductory courses in canoeing, kayaking, outdoor survival and other wilderness skills will be offered. This complements the Outdoors Club's hiking, canoeing, sailing and kayaking activities.

Each year Athletics and Recreation introduces a special recreation program for Residence students. If you're going to be in Residence, watch for it.

Intramural sports are highly popular at UVic, with hundreds of students participating each year. There are intramural leagues in Basketball, Floor Hockey, Ice Hockey, Soccer, Softball, Squash, Volleyball and Inner Tube Water Polo at competitive, recreational and co-ed levels.

You are invited to get involved with Athletics and Recreational Services at the University of Victoria.

MARTLET: For You, By You

A **Martlet** is not only, as you probably know, a mythical footless bird that is used on the University of Victoria's coat of arms. Nor is it only a European swallow with a forked tail. The **Martlet** is the name of the student newspaper at the University of Victoria.

Why do we call the paper the **Martlet**? As you probably know the swallow is an extremely fast bird, travelling at over 126 miles per hour (210 kilometers per hour). If you have been almost hit by the **Martlet** van as it tears around campus distributing papers every Thursday morning, or seen the way students pick up and read through the **Martlet**, you will know that it is aptly named.

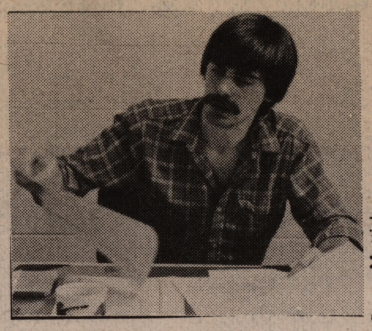
The **Martlet** is written entirely for students, by students. It is published by the student society weekly from September to April and goes on a once monthly schedule from May to August.

You will find that it is an important part of any year at this university: no one at UVic can afford not to read it. Inside you will find everything (almost) a student in Victoria needs and wants to know: what is happening on the university, in Victoria, in B.C., and in the rest of Canada, from a student's perspective; as well it will tell you where to eat, well and cheaply; what is available to do when you are tired of the books; and much more.

The editorials and the letters section are the best available gages of student opinion on campus and you are invited to share you opinions in the letters to the editor section.

Cartoonists, graphic artists, typesetters, proofreaders, photographers, circulation and office staff, and writers interested in covering all possible topics including university, local, provincial, and Canadian news, investigative reporting, entertainment, sports, student activities and world affairs are welcome and needed as **Martlet** staff.

If you are interested in working with a group of interesting and dedicated people on the **Martlet** this forthcoming year, drop in and see the editor, John Lutz. He is a friendly sort of person and is available both over the summer and September to April in the Student Union Building, room 109. The door is always open.



Genga Muttiah

Our door is always open: Martlet Editor John Lutz

SENDING AWAY

If you want more information about the University of Victoria, you can write for the Student Handbook/Ombudsman's Guide to UVic. Just clip out the coupon and mail it to the:

Alma Mater Society, University of Victoria, P.O. Box 1700, Victoria, B.C., V8W 2Y2

The student handbook is free. It is updated every year to provide new and returning students information about the services, facilities, resources, entertainment, and assistance that are available to them, both on campus and off.

Please send____copies of the University of Victoria Student Handbook to:

Name _____ Postal Code _____

Apartment & Street _____ Town/City _____ Province _____

Athletics Year in Review

University of Victoria's athletic accomplishments continue to grow and they are gaining national recognition. The recent 1980-81 academic year was no exception.

The basketball Vikings and Vikettes repeated as Canadian Interuniversity Athletic Union champions for the second consecutive year.

The back to back titles are unprecidented in C.I.A.U. records.

The UVic women's cross-country team also made history as they captured the first ever C.I.A.U. crown in women's competition.

The three national titles marked the most successful year ever for UVic athletics.

Optimism centres around the 1981-81 athletic season as UVic is determined to defend their national titles and hopefully will represent UVic at the national level in other sports.

All varsity teams are expecting improved performances over last year with the possibility of further championships becoming reality in the not to distant future.

VIKETTE BASKETBALL

—C.W.U.A.A. league champions—19-1 record
—Won Calgary Invitational Tournament
—Won Simon Fraser Invitational Tournament
—Won C.I.A.U. National Championship

VIKING BASKETBALL

—C.W.U.A.A. league champions—16-4 record
—Won University of Winnipeg Wesmen Classic Tournament
—Only C.I.A.U. team to defeat Athletes in Action in 1981
—Won C.I.A.U. National Championship

CROSS COUNTRY/MIDDLE DISTANCE [Men and Women]

—C.W.U.A.A. women's cross-country champions
—C.W.U.A.A. women's indoor championship
—Claimed six national titles in men's and women's competition at the C.I.A.U. indoor championships

VIKETTE FIELD HOCKEY

—Placed second in C.W.U.A.A.
—Only team to defeat national champions U.B.C.
—Won the Vancouver Island Ladies Field Hockey Association league title

ROWING [Men and Women]

—Undefeated in points trophies all year
—Won U.B.C. Invitational, Green Lake Regatta, Elk Lake Regatta, Elk Lake Fall and Spring Regattas and U.B.C. Dual Meet
—Competed at U.S. Nationals and English Henley Regatta's
—Five Canadian national team members involved in program.

RUGBY

—Considered by many as Canada's premier University side
—Swept three game tour of California
—Finalists of the UVic International Tournament 1981
—Have produced numerous provincial and national team players

SOCCER

—Eight Vikings selected to Canadian national team try-out camp.
—UVic named national training site and part of national development program.
—Coached by Brian Hughes, Canadian amateur team head coach.

SWIMMING

—Women placed third in C.W.U.A.A. conference despite no diving team
—Women placed sixth in C.I.A.U. championships
—1980-81 team doubled in size in only it's second year

VIKETTE VOLLEYBALL

—Placed third in C.W.U.A.A. national league
—Only team to defeat eventual champions U. of Saskatchewan
—Placed sixth at C.I.A.U. national tournament
—Regarded as most imporved women's team in C.W.U.A.A.

VIKING VOLLEYBALL

—Managed fourth place in extremely competitive C.W.U.A.A. league
—Surprised all with third place finish at C.I.A.U. nationals
—Defeated C.I.A.U. champs Alberta 3-0 at national tournament
—Possibly most improved team in the country

FRENCH

PLACEMENT: Students who have no French at all must register in French 100 or French 101. All other students will take a placement test at the beginning of the term. The results of the test will be used to advise students registered in inappropriate courses.

FIRST YEAR COURSES

French 100: Beginners' French
This course in an intensive introduction to spoken and written French with emphasis on oral work. It takes you to the end of Grade XI.

French 101-161: Accelerated Beginners' French [*6 units*]
In this course beginners will reach the level of Grade XII in one year.

French 160: Elementary Composition and Oral Practice
French grammar, composition and oral practice for people who have completed Grade XI.

French 180: French Language and Literature
A study of contemporary French texts, grammar, composition and conversation for students with Grade XII. This course is required for a Major in French.

If you are given advanced placement you may take:
French 290: French Oral and Written Practice
French 285: A Survey of French Literature
French 255: An Oral Course in French Civilization

For further information phone 477-6911 (local 4247) or visit us in the Clearihue Building, C243.

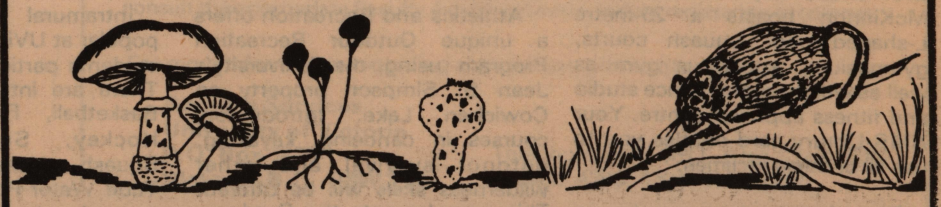
LE FRANÇAIS JE LE PARLE PAR

Department Of Biology

The University of Victoria is an ideal location for the study of Biology. The close proximity of sea and forest provide a unique opportunity by which field studies can be an important part of undergraduate Biology courses. The Biology Department has excellent laboratory facilities comparable to larger universities and has all of the necessary modern laboratory equipment, scanning and transmission electron microscopes, greenhouses, sea water system, research vessel, field station on Cowichan Lake and maintains close ties with the Bamfield Marine Station.

Introductory biology courses have small laboratory sections. The size of advanced courses allows for more individual attention and opportunities for individual study and projects by students. Program of courses is available for specializing in marine biology, ecology and botanical and zoological sciences. Courses required for all students include: Introductory Biology (or Biology 12), Introductory Botany, Zoology, Genetics, Ecology, Cell Biology and Physiology. A wide range of electives is available. Recommended high school preparation for Biology major: Grade 12 Biology, Chemistry of Physics and Mathematics. *Open Courses* (no prerequisites): Introductory Biology (150), Oceanography (310), Plants & Man (334), Environmental Issues (316), Economic Entomology (313), Genetics and Evolution (320), History of Biology (400).

Many opportunities exist for summer employment of Biology students and permanent employment of Biology graduates with nearby research organizations with which the Biology Department maintains close ties.



Interested in Working With People ?!

Consider one of the *Fastest Growing Professions* for *Men and Women*:

Child Care

What do Child Care Workers do?

- they are engaged in both preventive and therapeutic work with families and children
- they work in co-operation with physicians, psychologists, teachers, social workers and nurses
- they work in community centres, treatment residences, hospitals, schools, government offices and client homes.

What does the B.A. program in Child Care offer?

The Baccalaureate program is designed to provide students with an understanding of:

- normal and abnormal human development
- the inter-relationships of individuals, families and social institutions

with an emphasis on developing:

- skills and methods for working with people in a variety of settings in order to prevent and treat a wide range of human problems and to enhance positive social development.

Basic admission requirement: *Completion of Year 1 University, or equivalent*

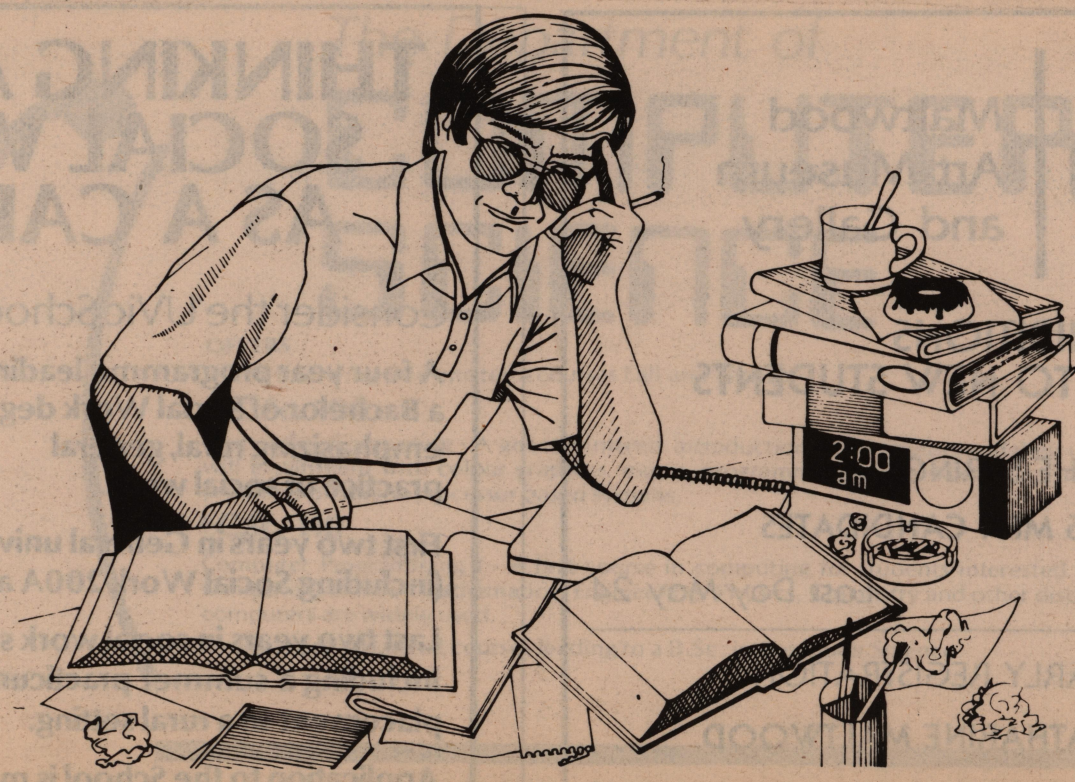
The Faculty sponsors Theatre and Music performances, Visual Art Exhibitions, Poetry readings, and lectures on the history of the Arts on a regular basis.

For information and a copy of the Faculty of Fine Arts Brochure, contact the appropriate departmental office or the Dean, MacLaren Building, Room A192.



Here's how to eliminate 18 hours of study time each week.

If your study technique is typical, you spend 26 hours each week buried in your books. 66-2/3% of this study time is wasted on an antiquated set of procedures. Procedures that have remained unchanged for over a hundred years.

What's worse, you presume there is nothing you can do to improve. The prevailing attitude on campus is "You either have it or you don't!"

What nonsense!

Any student with average intelligence can *improve his reading and study skills at least 3 times* with a) better techniques, b) expert coaching, and c) controlled practice. And he can do it quickly—in time to dramatically increase his grades in the current semester.

For this is precisely what the Evelyn Wood course offers, and backs it up with an iron-clad, no-nonsense, written guarantee.

THE GUARANTEE

Any student who attends every Evelyn Wood class, completes the required practice, yet does not improve reading and study skills at least 3 times will be eligible to receive a full tuition refund.

Over 1,000,000 Graduates Over 95% SUCCESS!

Since 1959, three Presidents have invited Evelyn Wood instructors to teach their staffs how to read better. All in all, the list of famous graduates reads like Who's Who:

Hugh Alexander. *U.S. Congress*	Charlton Heston. *Actor*	Gaylord Nelson. *U.S. Congress*
Birch Bayh. *U.S. Congress*	Daniel K. Inouye. *U.S. Congress*	Julie Newmar. *Actress*
Jackson Betts. *U.S. Congress*	Edward Kennedy. *U.S. Congress*	William Proxmire. *U.S. Congress*
Daniel Brewster. *U.S. Congress*	David S. King. *U.S. Congress*	Abraham Ribicoff. *U.S. Congress*
Allan Cranston. *U.S. Congress*	Burt Lancaster. *Actor*	Herman Scheebeil. *U.S. Congress*
John Dingell. *U.S. Congress*	Thomas J. McIntrye. *U.S. Congress*	George Segal *Actor*
Madame Gandhi. *India*	Marshall McLuhan. *Writer*	Al Ulman. *U.S. Congress*
John Glenn. *U.S. Congress*	Joseph M. Montoya. *U.S. Congress*	J. Irving Whalley. *U.S. Congress*

Why Do So Many Students Enroll?

This question was posed to several thousand college freshmen who had just enrolled in the Evelyn Wood course. The answers were varied, but mostly on the same wave length: 1) They wanted to reduce their study time; 2) They wanted to feel more confident in class, more in control; and 3) They wanted to learn more, to achieve better grades.

At the end of the course, each student was asked if his goals were met. Over 95% said yes. The other 5% received their tuition back

Why Do Most Students Read Slowly?

Most students have no idea what their reading ability is. If they are typical, they read about 300 words per minute (or one page of a novel). Why is it that students read at virtually the same speed, considering how very different they all are?

The cause can be traced back to the First Grade. When we were taught to read, we were asked to read out loud, word-by-word. Later, in the Second Grade, we were asked to stop saying each word out loud. But we never really did. Fact is, you're saying these words right now—not out loud, but to yourself, *one word at a time!*

This means you read only as fast as you talk—about 250 to 300 words per minute. (As if to prove the point, Guiness's Book of World Records lists John F. Kennedy as delivering the fastest speech ever at 327 words per minute).

How Do You Learn To Read Faster? With The Same Comprehension?

At the Mini-Lesson you will find out how the Evelyn Wood course eliminates the habit of reading only one word at a time. How you can learn to read 3 or 4 words instead of only one. To see how natural this is, look at the dot in the middle of this phrase:

the grass · is green

Try as you may, you can't help but see the other words. With training, you learn to use this natural, but un-used potential. You learn to see groups of words simultaneously. This will double, triple, possibly quadruple your present ability.

This concept is diametrically opposed to the old-fashioned speed reading technique of picking out key phrases. In the Evelyn Wood course, skimming is a dirty word!

The PRICE BOILS DOWN TO $2 AN HOUR.

Read what the University of Illinois student paper said (Ed Sejud): "If a student avails himself of all the facilities by the (Evelyn Wood) Institute and attends all the class sessions, the price boils down to only about $2 an hour, cheaper than any private tutoring you'll ever find. Spread over four years, the course can save thousands of study hours and can probably affect a boost in a student's grade-point average. Assignments which once took days can be accomplished in a matter of hours, leaving much more time for other pursuits. The Institute estimates that it can save average students 350 hours of study time each semester—probably an understatement".
